¹ The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States is due chiefly to the fact that the United States figures are for the value of duty for the use of Government vessels.

¹ Figures on Boise and Strawberry Valley projects include portions of acreages, and values of crops therefrom, served under Warren Act, for which a crop census was taken.

² Areas Bureau of Reclamation was prepared to supply water.

³ Irrigated crops. Excludes small areas on few projects cropped by dry farming.

⁴ Includes \$140,710 worth of crops on Strawberry Valley project, grown on additional Warren Act lands not covered by crop census.

⁵ Data furnished by Salt River Valley Water Users' Association, which operates the project.

⁶ Includes 17,256 acres reported as vacant, "home tracts," etc., on which no crops were reported.

⁷ Ultimate irrigable acreage

⁸ Figures do not cover additional area on project cropped without irrigation.

⁹ Considerable area cropped without irrigation.

¹⁰ Figures are for 240 irrigated farms, which included 2 farms using water, but having no crops.

¹¹ Figures do not cover an additional area of 13,710 acres cropped by dry farming.

¹² Figures do not cover 44,536 acres of Tule Lake leased lands, cropped without irrigation.

¹³ 20,200 acres cropped, irrigated by project water only; 24,200 acres cropped were furnished 89 per cent of the water used.

¹ A minus sign (-) denotes decrease.

² Figures for 1909 do not include cost of operation and maintenance for rice-growing districts in Gulf States; consequently, figures for 1909 and 1919 are not comparable.

³ When water is pumped, cost of operation and maintenance includes cost of fuel and attendance.

It is believed that the returns are incomplete, some crops actually grown not having been distinguished as such. In the tabulation for each State crops of area in the State was reported as less than 500 acres were omitted, but these form such a small part of the total as to be negligible]

No. 505.—DRAINAGE OF FARM LANDS AND DRAINAGE ENTERPRISES IN THE UNITED STATES, 1920

[NOTE.—The statistics of drainage on farms in the first part of this table and the statistics of drainage enterprises in the second part are from wholly different sources and are not comparable. The former are from schedules of individual farmers and the latter from a special canvass of organized drainage enterprises. A drainage enterprise may have artificial drainage without being connected with any general enterprise. The statements of farmers as to additional land needing drainage are likely to be less precise than those as to area actually drained artificially. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. The enterprises in some States include considerable areas of timber and other unimproved land not in farms. The canvass of drainage enterprises did not include any of the northeastern States, and no enterprises were found in Alabama, Virginia, or West Virginia]

FARMS—GENERAL STATISTICS

No. 509.—POPULATION, FARMS, AND FARM PROPERTY

[NOTE.—The schedule for 1925 did not call for "improved land." The combined total for "crop land," 391,466,482 acres, and "plowable pasture land," 114,801,599 acres, aggregating 506,068,081 acres corresponds in a rough way to the definition of "improved land" at previous censuses. Figures for 1920 and 1925 relate to Jan. 1, for 1910 to Apr. 15, and for earlier years to June 1]
